## 1. Nature of business and going concern

Labrador Gold Corp. (formerly Nikos Explorations Ltd.) ("Labrador Gold" or the "Company") is a company involved in the acquisition and exploration of prospective gold projects in the Americas. It was incorporated under the Business Corporations Act (British Columbia) in 1987. The Company is listed on the TSX Venture Exchange ("TSX-V") under the symbol "LAB". Its principal office is located at Suite 1260-355 Burrard Street, Vancouver, B.C. V6C 2G8, Canada.

The Company is focused in conducting gold exploration in the province of Labrador, Canada, and also has mineral right interests in Ontario, Canada. At the date of these financial statements, the Company has not yet determined whether any of its mineral interests contain economically mineral reserves. Accordingly, the carrying amount of its mineral right interests represents the cumulative acquisition costs and exploration expenditures incurred to date, which does not necessarily reflect present or future values. The recovery of these costs is dependent on the discovery of economically recoverable mineral reserves and the ability of the Company to obtain the necessary financing to undertake continuing exploration and development, and to resolve any environmental, regulatory or other constraints.

These financial statements have been prepared on a going concern basis, which assume that the Company will be able to continue in operation for a reasonable period of time and will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has made an assessment of its ability to continue as a going concern and is aware of several material adverse conditions as set out below that cast significant doubt on the validity of this assumption.

The Company is a mineral exploration company with a history of recurring losses and without a source of revenue. At March 31, 2020, the Company had no source of operating cash flow. Operations in recent years have been funded from the issuance of share capital and cash on hand.

Given its current stage of operations, the Company's ability to continue as a going concern is contingent on its ability to obtain additional financing. In the event the Company is unable to raise adequate financing or meet its current obligations, the carrying value of the Company's unproven mineral right interests could be subject to adjustments.

These financial statements are presented in Canadian dollars and all values are rounded to the nearest dollar except where otherwise indicated.

These unaudited condensed interim financial statements were authorized for issue by the board of directors of the Company on May 29, 2020.

In preparing these unaudited condensed interim financial statements, the significant judgments made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the financial statements for the year ended September 30, 2019.

Ownership in mineral right interests involves certain inherent risks due to the difficulties of determining and obtaining clear title to claims as well as the potential for problems arising from the ambiguous conveyance history of many mineral right interests. The Company has investigated ownership of its mineral right interests and, to the best of its knowledge, ownership of its interests are in good standing.

### 10. Subsequent event

Since December 31, 2019, the outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility and weakness. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Corporation and its operating subsidiaries in future periods.
